

WORKSHOP 1.10

Version #1

Question: Calculate the height of the flagpole at the north end of Main Mall without crossing or measuring the pavement surrounding the pole.

Version #2

Question: Calculate the height of the clock tower outside of the IKB Library without crossing the concrete in front of the library's rear staircase or measuring the concrete surrounding the clock tower.

Version #3

Question: Locate the portion of the Sauder building next to Tim Horton's that houses its spiral staircase and elevator shaft. Calculate the height of the peak of this part of the building without taking any measurements within the building itself or any measurements starting or ending at the building.
