

## SPHERICAL COORDINATES

$\rho$  = distance from  $(x, y, z)$  to  $(0, 0, 0)$

$\phi$  = angle between the line  $\overline{(0, 0, 0)(x, y, z)}$  and the  $z$  axis

$\theta$  = angle between the line  $\overline{(0, 0, 0)(x, y, 0)}$  and the  $x$  axis

$$x = \rho \sin \phi \cos \theta$$

$$y = \rho \sin \phi \sin \theta$$

$$z = \rho \cos \phi$$

$$\rho = \sqrt{x^2 + y^2 + z^2}$$

$$\theta = \tan^{-1} \frac{y}{x}$$

$$\phi = \tan^{-1} \frac{\sqrt{x^2 + y^2}}{z}$$

surface of constant  $\rho$

surface of constant  $\theta$
